TOUR & ACTIVITIES

Sardinia boasts numerous fascinating characteristics and even its typical Mediterranean nature hides a richness and variety which make it the ideal destination for unique experiences such as cycling, trekking and spelaeology expeditions, as well as diving.

BIRDWATCHING

The island of Asinara, a very good nature reserve, now uninhabited, and with very good but limited birdwatching, as visitors are not allowed to roam free over the island. A few kilometers south of Stintino there are several stagni (brackish lagoons) that are excellent for birdwatching, as well as some good coastal macchia scrub and a small area of seasonal marsh. Stintino's specialities include Flamingo, Spoonbill, Slender-billed Gull, Black-winged Stilt, Little Tern and Kentish Plover.

CANOEING TRIP

Asinara island is a wonderful place for canoe excursion amateurs. Along the coast and in still untouched coves, the visitor can discover almost virgin places which can only be reached by sea. Various circuits are planned either for beginners or for experts. Families can also practise with the guide's permanent assistance while experienced groups can go out completely on their own.

JEEP TOUR

After a short visit to the tortoise hospital, you will get into one of our two Jeeps, which are perfectly appropriate for the island environment and can carry, in rather comfortable conditions, up to 8 passengers.

During the first part of the visit the guide will explain to you Asinara story. While going to Cala Reale, your next stop, you will probably be lucky enough to see most of the unique and specific wildlife of Asinara. No doubt a white albino donkey or a whole family of wild boarswill cross your path. You cannot leave the island without going to Cala Sabina. In this paradisiacal place probably one of the most beautiful and authentic beaches of the Mediterranean sea is hidden. You will swim and dive in pure waters to discover the sea depths.

BIKE TOUR

It is possible to travel the park's path by bycicle,following the signs and trail signs simply with the help of maps. Most of paths are entirely passable by two heels. From Fornelli, for example, an excursion to Castellaccio is possible, to the source from which it is then necessary to continue by foot. The simplest water path is entirely cycle, while the Granito one is covered by bike along the sea to Punta Li Giorri. In Cala Reale there are easy cycle paths that retrace the path backwords Memory of the Island. Toward Trabuccato It is possible to follow the path of the white donkey which allows numerous encounters with this very confident characteristic animal.

DIVING

Scuba diving is mainly done for the attraction of the unattainable undersea world. It is one area of nature that mankind has not been able to fully control, we simply are not able to breathe underwater. Hence, scuba diving gives us an opportunity to be in that underwater world, even if it is just for a limited amount of time.

VISIT TO CALA D'OLIVA PRISON

In Cala d'Oliva we will find the namesake small port, one of the main landings in Asinara together with Cala Reale and Fornelli. This is a very important area for two reasons: the first concerns the two stunning beaches characterised by pure white sand and crystal clear water. Sa Murighessa (or "beach of the prisoners") lies south of the promontory, while the other one is close to the port and the town, which is the only populated place on the island. The second reason is related to the former penal colony, right behind the town, whose buildings, which are open to the public, now host the Park headquarters: Park Authority and Environmental Education Centre.
